

BUSINESS REQUIREMENTS DOCUMENT (BRD)

Project Title: HR Analytics Dashboard

Tool Used: Tableau

1. Business Context / Problem Statement

Organizations face challenges in understanding workforce composition, monitoring employee attrition, and identifying demographic patterns that impact retention and productivity. This dashboard provides a centralized HR analytics solution to enable data-driven decision-making.

2. Goal of the Dashboard

- Understand overall workforce size and structure
- Identify departments, roles, and age groups with high attrition
- Support workforce planning and diversity initiatives

3. Target Users / Stakeholder Personas

User Persona	Primary Need from Dashboard	Expected Usage
HR Manager	Monitor attrition and workforce stability	Monthly / Weekly review
HR Business Partner	Identify retention risk areas	Decision support
Senior Management	High-level workforce insights	Strategic planning
Recruitment Team	Demographic and workforce trends	Hiring planning

4. Core Business Questions

1. How many employees does the organization have?
2. What is the overall attrition rate and attrition count?
3. Which departments and job roles have the highest attrition?
4. How does attrition vary by age group and overtime?
5. What is the demographic composition of the workforce?

5. Product-Style KPIs to Track

KPI	Definition
Total Employees	Total number of active employees
Attrition Count	Number of employees who left the organization
Attrition Rate	Percentage of employees who left
Average Monthly Income	Average income across employees
Department Headcount	Employee count by department

6. Scope of the Dashboard

In Scope:

- Employee Overview dashboard
- Attrition Analysis dashboard
- Employee Demographics dashboard

Out of Scope:

- Predictive modeling
- Individual employee performance analysis

7. Success Criteria (Measurable Outcomes)

- Stakeholders can identify high-attrition areas quickly
- HR uses insights for retention and planning decisions
- Reduced manual reporting effort
