

FUNCTIONAL REQUIREMENTS DOCUMENT (FRD)

Project Title: HR Analytics Dashboard

Tool Used: Tableau

2. Dashboard Sections

Overview Section:

Provides a high-level summary of employee metrics including total employees, attrition rate, department-wise distribution, and gender split.

Drilldown Sections:

Attrition Analysis – detailed view of attrition by department, job role, age group, and overtime.

Employee Demographics – detailed analysis of age, gender, education field, and business travel.

3. Data Requirements

Dashboard Section	Data Fields Needed	Source
Overview	Employee ID, Department, Gender, Age, Monthly Income, Attrition	HR Employee Dataset
Attrition Analysis	Attrition, Department, Job Role, Age Group, Overtime	HR Employee Dataset
Employee Demographics	Age, Gender, Education Field, Business Travel	HR Employee Dataset

4. Filters / Slicers

- Department
- Job Role
- Gender
- Age Group

5. Visuals / Charts

Dashboard Section	Visual Type(s)
Overview	KPI Cards, Bar Chart (Department Headcount), Donut Chart (Gender), Bar Chart (Age Group)
Attrition Analysis	Bar Charts, Donut Chart (Overtime), Line Chart (Attrition Trend), Heatmap
Employee Demographics	Bar Charts, Donut Chart, Treemap

6. Interactivity

- Cross-filtering between charts
- Dashboard-level filters
- Interactive tooltips
- Navigation between dashboards

7. Calculations / Measures

Calculation Name	Formula	Purpose
Total Employees	COUNT(Employee ID)	Shows total workforce size
Attrition Count	COUNT(IF Attrition = 'Yes' THEN Employee ID END)	Counts employees who left
Attrition Rate	Attrition Count / Total Employees	Measures workforce stability
Average Monthly Income	AVG(Monthly Income)	Compensation analysis

8. Notes / Special Instructions

- Use consistent color coding across dashboards
- Ensure charts are optimized for readability
- Maintain business-friendly terminology
- Dashboard should support executive-level review
